Methods of Analysis, Investment Strategies and Risk of Loss (8)

Investment Philosophy

Accountable Financial Planning LLC has the following investment philosophy:

- We believe that every investment has risk and offers potential rewards.
- We believe it is important to help clients evaluate their goals and risk tolerance, and to develop an investment strategy that addresses both.
- We believe that fixed income investments play an important role in reducing risk, and that including a global mix of stocks in a variety of sizes and styles provides the best combination of investment risk and investment return.
- We believe that attempts to time the market or make predictions about individual stocks or market segments will not be beneficial over the long run.
- We believe that setting a target portfolio allocation and periodically re-allocating to control risk and improve tax and cost efficiencies is an excellent strategy.
- We believe that it is important to regularly review portfolio allocations in light of a client's changing goals and situation.
- We believe that modifying the target allocation is appropriate when the client's goals or situation changes.
- We believe that using low-cost funds and minimizing transaction costs is critical to maximizing long-term investments returns.

Personal Trading

Principals and employees of Accountable Financial Planning LLC and related persons may own or purchase shares of mutual funds, stocks, or other securities that may also be recommended to clients. Such ownership interests are minimal compared to the total assets of any security being recommended. No recommendations will be made to clients where the value of a related person's holdings would be influenced by the making of such a recommendation.

Brokerage Practices (12)

Broker Recommendations

Accountable Financial Planning LLC may recommend a broker to a client based on the client's situation and need for a particular service, but has no authority to select a broker for a client. The final decision remains with the client. Discount brokers are typically recommended for general trading where no special service requirement is deemed necessary and where the level of service provided is commensurate with the commission charged. Full commission brokers may be recommended when special research capability or knowledge is required if it is believed that the higher commission paid by the client is justified.

Accountable Financial Planning LLC does not receive any compensation as a result of these recommendations.

Accountable Financial Planning LLC does not receive referrals from broker-dealers it may recommend.

Research and Soft Dollar Benefits

Accountable Financial Planning LLC does not receive research, soft dollars, or other products and services (other than execution) from a broker-dealer or a third party in connection with client securities transactions.

Trade Aggregation

Clients must choose this method of fee payment and must provide consent. Clients always have the option to pay fees directly by check and may opt to do so at any time. Invoices are provided to clients in advance of fees being paid from an account. The invoices detail the amount of the fee, the account from which the fee will be paid, and date range during which the fee will be paid. Fee payment transactions appear in the account history and on the account statements provided by the custodian, so clients may review them for accuracy and are encouraged to do so.

For clients who have contracted for investment advice and planning, Accountable Financial Planning LLC develops an investment plan that typically includes a target asset allocation with various defined parameters. Specific investment recommendations are typically provided in written format as part of the financial plan.

If appropriate authority has been granted by the client, Accountable Financial Planning LLC will proceed to implement the client-approved investment strategy by purchasing or selling specific mutual funds or securities in various client accounts, as recommended in the written plan.
